

# RISE VISION IS A GAME CHANGER AT BURKBURNETT ISD

“Rise Vision has really changed the way Burkburnett ISD gets information out.”

[www.risevision.com](http://www.risevision.com)

## OBJECTIVES

Before Rise Vision, Burkburnett ISD struggled with their digital signage setup. They used Impero and laptops connected to displays running Google Slides, which was difficult for non-tech-savvy users.

The schools wanted the announcements to play on the TVs but the displays were challenging to run and often blank. When Becky Montgomery became the Director of Technology in 2021, her first mission was to find a real digital signage tool. They **needed an affordable, user-friendly solution** that also looked nice.

## SOLUTION

Burkburnett ISD chose Rise Vision as their digital signage solution after exploring different options. Becky said, “*We found Rise Vision, and it saved the day!*”

Now, all schools in the district broadcast announcements on their TVs. Elementary schools use displays in front offices to enhance parent communication, while middle and high schools strategically place displays throughout the campus to keep students informed. Rise Vision also integrates with the district's panic button alert system, **Centegix**, displaying emergency messages during crises.

## BENEFITS

### 1. Easy Management

Rise Vision's user-friendly interface simplifies display management.

### 2. Improved Communication

Consistent announcement displays facilitate effective communication.

### 3. Enhanced Safety

Rise Vision seamlessly integrates with Centegix, improving safety measures.

## BECKY MONTGOMERY

Director of Technology

“Rise Vision has really been a game changer for us. Not only is it getting information out to our parents and students, but it is also fun to look at, easy to use and it's affordable.”
